Profile

Hardware and Field Service Engineering (EPOS | ATM | back office | data cabinets): 2019 - present

Implemented upgrades and modifications in EPOS systems and ATM machines across the UK to improve their services and/or prepare them for advancements in technology.

- Increased their security, efficiency, and speed, and enabled communication of critical information.
- Improved accessibility for colleagues during future visits, reducing their time spent on site.
- Reduced power consumption, customer serving times, and improved the customer-facing experience for staff and customers alike.

Other experience: 2009 - present

Fast food delivery and in-store assistance, IT technician work, and restoration of rooms in retail stores.

Game development (Unity | C# | Visual Studio): 2014 - present

Led game development to completion on independently-assigned projects, including games in the hyper-casual sector as well as on 3D platform games, working either fully remotely or hybrid, to given specifications.

Presented test builds and backups to managers, and liaised with them regarding game design and art style decisions, timeframes for feature implementation, and acquisition of suitable assets from online stores.

Researched and implemented methods of monetisation in applications without disrupting or infringing on the user experience.

Web development (HTML | CSS | GitHub.com/Pages/Desktop | Netlify): 2021 - present

Increased exposure of personal portfolio, project source code, skills and experience through multiple static websites developed using templates modified with HTML and CSS, hosted on GitHub Pages and Netlify.

Skills

- Unity and web development (C#, HTML, CSS) with Visual Studio | Game design
- IT hardware engineering (hardware and computer component removal, replacement, installation, and configuration with Notepad and testing using command line (cmd))
- Installation, usage and troubleshooting of computer operating systems and applications (Windows | Mac OS | Linux | Android | iOS | iPadOS)
- Microsoft Office (Word | Excel | PowerPoint) | Google Docs Editors (Docs | Sheets | Slides)
- Cloud storage and image hosting (OneDrive | Dropbox | Google Drive | MEGA | ImgBB)
- Version control (GitHub | GitHub Desktop | GitKraken) | Static website hosting (GitHub Pages | Netlify)
- Video and audio editing (Vegas Movie Studio | Audacity | SONAR)
- Digital inspection and paperwork software (iAuditor, Protean)
- Full UK driving licence with experience driving cars, city vans, and transit vans
- ATM engineering (IT and mechanical)
- Journey scheduling, planning and mileage tracking with Google Maps and spreadsheets
- Data/communications cabinet engineering (cable tracing, data jack patching, connection of hardware to networks, cable identification and labelling, removal of obsolete/unused cabling, power supplies, and IT hardware)
- IT sales

Experience - Games and web development

March 2021 - present: Content creator and Unity/web developer @ Blue Carbon Media

- Responsible for the creation and maintenance of the company's growing GitHub profile and multiple static websites, where their games and staff profiles are displayed.
- Authored web pages which display games developed by the company, with descriptions, screenshots, and download links.
- Updated and cleaned project source code to display on the company's GitHub profile.

November 2020 - January 2021: Unity Developer (mobile, Android/iOS) @ (unnamed)

- Sole developer of a product developed to a provided specification. Contributed ideas for gameplay elements and overall design, and fully responsible for all aspects of the game's development and project structure.
- Identified the need for certain equipment and company subscriptions to asset stores, and drew up a full specification which was successfully actioned by the company, saving thousands of pounds per year on individual seats and subscriptions and drastically improving developer workflow.

September 2017 - July 2018: Unity Developer (PC) @ Blue Carbon Media

- Led development on a solo experiment to recreate a character controller from an old platform game, and subsequently to develop it into a new IP.
- Fully responsible for all programming/in-engine development, 3D modelling/texturing, image editing and graphic design, audio editing, and publishing to multiple platforms.
- Additional theory and logic, textures and other assets contributed by friends and purchased online. QA testing/feedback provided by friends.

August - November 2016: Unity Tutor @ Blue Carbon Media

- Developed a beginner's Unity Development course and taught multiple students.

April 2016 - August 2016: Scenario writer @ Old Dead One Productions

- Completed the full scenario with all branching/varied dialogue options for the Steam-greenlit game Ethos: It Begins Again.

October 2014 - March 2016: Game Developer/3D Artist @ Blue Carbon Media

Engaged in further study of multiple technologies pertaining to games development, and subsequent development of various utilities, software, and games, as a continuation of university studies.

- Unity | C# | Unreal Engine 4 | C++ | Autodesk 3DS MAX | Cakewalk SONAR | Audacity | Visual Studio

October 2013 - May 2014: Game developer (university projects w/ Unity, UnityScript, 3DS MAX)

Sole developer of two games:

- A third-person aerial shooting game intended to explore the mechanics of AI-controlled enemies in the games Left 4 Dead 2 and Payday 2.
- A first-person tower defense game demo inspired by the indie game Sanctum (2011) with game mechanics based on the properties of IT hardware.

Experience - Field Service Engineering (Contractor)

December 2021 - Present: ATM Engineer contracted by Pyramid Search and Selection for Cennox Group Ltd @ (TBD) (day work, regional)

August - December 2021: IT Engineer contracted by Concept Resourcing for Barron McCann IT Services

November - December 2021: Breakfix Engineer (Devon, Somerset, Cornwall)

- Ensured continual operation of retail stores at maximum efficiency by responding to IT issues reported on site, and travelling long distances to sites to fix said issues with IT hardware.

August - November 2021: Project Engineer working in AllSaints, WH Smith, Nando's, Vision Express, ASDA, Claire's (UK-wide)

- AllSaints (late work): Improved customer-facing experience for employees and customers and reduced serving times, through upgrades of till computers and peripherals (hardware refresh).
- WHSmith (day work): Deinstalled and reclaimed disused EPOS hardware from both operating branches and permanently-closed branches in Central London, ensuring proper disposal/refurbishment of hardware.
- Nando's (day work): Facilitated communication between Nando's head office and networked peripherals on site, by ensuring that a network connection could be made.
- Vision Express (day work): Co-authored secure technical documents with a senior BMc engineer and a senior VE engineer, detailing works to be carried out in order to change a branch's identification number, while carrying out said works.
- ASDA (day work): Improved QOL and sped up document printing processes for office staff in supermarket distribution centres by performing hardware refreshes of commercial printers.
- Claire's (day work): See WHSmith (above).

June - August 2021: ATM Engineer contracted by Pyramid Search and Selection for Cennox Group Ltd @ HSBC and Barclays Bank (day work, regional)

- Enabled branches to introduce the new polymer £50 note into and remove the old paper £50 note from circulation, by making the necessary software and hardware upgrades and adjustments to cash handling devices and ATMs across the UK.

September - November 2020, January - March 2021, and May - June 2021: Project Engineer contracted by Concept Resourcing

May - June 2021: 4G Network Surveyor (Project Engineer) for Barron McCann IT Services (day work) @ TK Maxx stores (national)

- Determined optimal locations for new equipment installations by measuring mobile network signal strength in various locations inside stores.

Jan - Mar 2021: EPOS Engineer for G+D Currency Technology and Greensafe IT (day work + night work) @ Tesco stores (regional)

- Increased security and efficiency of cash handling, as well as satisfaction of cashiers, by replacing and configuring currency-handling units and removing old, emptied units from site to store at a storage facility for disposal later on.
- Successfully completed preparations for impending work by visiting multiple stores per day and conducting a thorough survey of each property to ensure their readiness for the work.

Sep - Nov 2020: IT/Data/Comms Cabinet Engineer for Barron McCann IT Services (day work) @ ALDI stores (national)

- Facilitated communication of hardware statuses by adding new hardware to connect them to the network, thereby massively improving response time to any issues with these devices.

- Improved accessibility to individual sections of the store's data cabinet, reduced overall power consumption, and reduced time taken for engineers to work on the cabinet later on through removal of obsolete hardware and cables and labelling of cabinet sections.
- Increased back-office efficiency through installation and configuration of new IT hardware and removal of old hardware for disposal.
- Improved efficiency of future work and allowed for better planning of said work by recording and submitting the physical locations of hardware on site to the customer.

February - March 2020 and August 2020: ATM Engineer contracted by APM Resource for JBrand and Diebold Nixdorf @ Barclays Bank (day work, regional)

- Enabled branches to introduce the new polymer £20 note into and remove the old paper £20 note from circulation, by making the necessary software and hardware upgrades and adjustments to ATMs across the UK.
- Improved performance of ATM machines and reduced overall customer service times through RAM upgrades.

October 2019 - January 2020: Project Engineer contracted by Concept Resourcing

Improved security, speed, and the customer facing experience, and reduced serving times of cash registers and ATMs across the UK, by driving long distances to install, replace, upgrade, modify and/or configure electronic devices in service of these improvements.

December 2019 - January 2020: ATM Engineer (regional) for Rico Logistics and Cardtronics (day work) in Co-Operative Food, Nisa Local, McColl's, and Waitrose

- Improved security, speed and customer experience of freestanding ATM machines by applying software and hardware upgrades to ATMs, significantly reducing outage times and overall service times.

October 2019 - November 2019: EPOS Engineer (UK-wide) for Barron McCann IT Services in TK Maxx, DW Sports, and Pret A Manger

- TK Maxx (day work): Averted potential issues with new Windows machines in stores by rolling them back to older models, successfully preventing these issues from negatively impacting trading and end-of-day banking.
- DW Sports (late work): Hardware refresh (see AllSaints 2021).
- Pret A Manger (late work): Hardware refresh (see AllSaints 2021).
- Pret A Manger (day work): Facilitated communication of recently completed work to the customer's head office by auditing and carrying out quality assurance checks on recently upgraded stores, enabling the customer to clearly see that work had been carried out successfully.

Duties

- Planning of journeys to and from home/hotels, as well as booking accommodation, to maximise time savings and fuel efficiency.
- Checking availability of parking on or near the site, sometimes by calling site managers or store managers, to minimise time wasted driving around sites with unhelpful layouts.
- Establishing a rapport with staff on site, signing in and discussing work to be carried out.
- Confirming whether relevant equipment on site is fully functional, to ascertain whether or not the job can be completed to a satisfactory degree.
- Offloading all equipment from the vehicle so that the work may be carried out, and reloading the vehiucle at the conclusion of works, leaving the store clean and tidy for the safety and security of the staff and customers the next day.
- Completing all works to the script provided by the customer.
    - Carefully removing all traces of old hardware and labelling it for the convenience of the warehouse staff at headquarters, and ensuring that surfaces are clean and presentable for the staff and customers alike.
    - Installing and configuring new hardware, ensuring that it is ready for the store to trade the next day.
- Travel to designated pick-up/drop-off (PUDO) locations during projects, to pick up/sign out new hardware for installation and drop off/sign in old hardware for disposal, as well as trade equipment (computer peripherals, tools) and any keys required to access sites and/or carry out work.
- Paying for parking and/or using toll roads and congestion zones, then uploading receipts to online portals and logging all expenses and hours worked to send off for full reimbursement of all provided services.

Experience - Other

Mar 2018 - Sept 2019: Delivery Driver for Domino's Pizza, Ilkeston, Derbyshire

- Delivered hot food to customers, restocked the shop floor, cleaned and organised delivery bags, packed hot food for delivery, labelled food packaging, organised and dispatched orders, hand-washed utensils, and assisted with store closure.

Jan - Oct 2017: Delivery driver for Pizza Hut Delivery, Dunstable, Bedfordshire

- As above.
- Significantly increased available working space in front of store by deinstalling EPOS equipment on multiple unused tills.

Oct 2016 - Jan 2017: Delivery driver for Papa John's, Dunstable

- Delivered hot food to customers and prepared food packaging for use.

November 2015 - April 2016: Wholesaler's assistant @ RJD Enterprises, Luton

- Picked stock from a local warehouse as per orders placed by convenience stores in Bedfordshire, Hertfordshire, and Northamptonshire, and packed it into boxes to be delivered to said stores.
- Loaded delivery boxes onto a transit van, then accompanied the proprietor as a driver's mate to assist with delivering stock to addresses.

October 2015: Sales assistant @ WHSmith, London Luton Airport

- Restocked shelves and assisted customers on the shop floor.
- Assumed team leader role amongst temporary staff to restore deteriorating, disorganised stockrooms.
    - Sorted through and cleared out occupied roll containers (cages) containing expired, damaged or mixed-up stock, allowing for cages to be reused. Improved accessibility for staff in stockrooms by clearing the gangway.

2009 - 2015: Additional temporary work, voluntary work, and work experience:

- **The Post Office Company | Nisa | PC Clinic | CPM**

Education

2011 - 2014: London College of Communication, University of the Arts London

- BA (Hons) Game Design (Top-Up), 2:2 with Honours | FdA Games Design, Merit

2004 - 2009: Icknield High School

- GCSEs: Mathematics - A | Science - B | Additional Science - A | English Language - C | 3D Design - C | ALAN (Adult Literacy and Numeracy) - B | IT - C, C, C

Interests

- Casual and competitive PC gaming, viewing of esports and streamers playing competitive PC games, and studying said games
- Cooking and watching cooking channels on YouTube
